

#### OUR PRODUCTS

# BlueSelect Sump Pump Kits

A sump pump pit is a purpose-built collection point designed to safely capture and remove wastewater, stormwater, or liquid waste from areas where it can't naturally drain away.

Think of it as a controlled holding area: water flows into the pit, and a pump system then transfers it to an approved discharge point—keeping your site clean, compliant, and operational.

## THE RANGE

- ✓ BSSP-450-150V
- ✓ BSSP-450-250V
- ✓ BSSP-450-400V
- ✓ BSSP-450-750V
- ✓ BSSP-600-150V
- ✓ BSSP-600-250V
- ✓ BSSP-600-400V
- ✓ BSSP-600-750V

## The BlueSelect Difference

BlueSelect products are purpose designed and built pump systems, engineered for reliability, durability, and ease of maintenance. Developed in partnership with the industry, this superior range of products integrate seamlessly with any site and specification requirements, providing the trade with peace of mind and confidence. Pre-Assembled, ready for rapid deployment.

## BlueSelect Sump Pump Pit Accessories & Options:

✓ All-Poly Wetted Parts (lead free)

Engineered for harsh or high-wear environments where metal components may deteriorate.

✓ Solid Cover (Optional)

A heavy-duty lid engineered for additional security, load rating, or odour control. Perfect for commercial and industrial applications.

✓ Uniseal Pipe Inlet Seal (Optional)

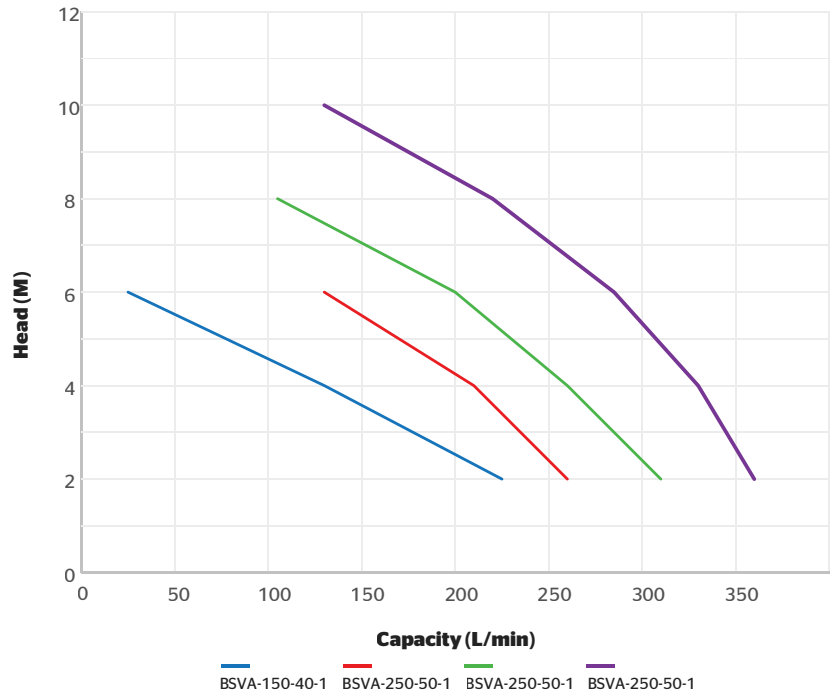

A flexible, and reliable penetration seal that allows for quick and leak-free pipe entry into the pit. Great for retrofits or custom installations.

## What Pump-Out Pits Are Used For

Pump-out pits are commonly installed in:

- Industrial and commercial sites where liquids need managing
- Workshops and washdown areas
- Agricultural and pumping operations
- Low-lying or hard-to-drain areas
- Sites that require liquids to be elevated to holding vessels
- Basements and ground water seepage
- Properties with stormwater drainage issues

Performance Curve - BSA Series (50Hz)

## Why They Matter

A well-designed pump-out pit helps you:

- Prevent flooding and site downtime
- Meet environmental and compliance requirements
- Keep operations cleaner and safer
- Improve efficiency by managing wastewater in a controlled way
